prime SERIES

ROBOTIC
CLEANERS

FAST CLEANING. POWERFUL SUCTION. ULTIMATE SIMPLICITY.

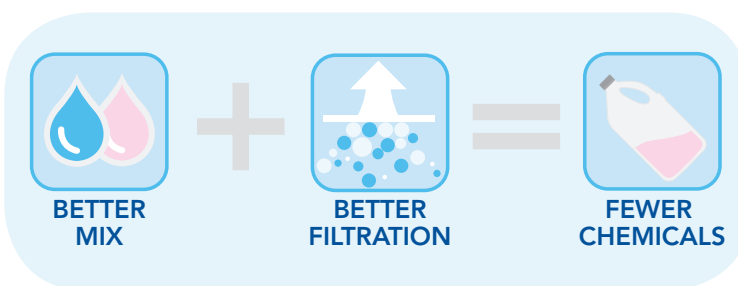

The **Aquabot Prime S-600** and **S-300** are designed to Speed-Clean Residential In-Ground Pools of all sizes and surfaces. Thanks to the patented AquaSmart Gyro System, the Prime S600 and S300 will automatically brush, vacuum and micro-filter dirt, debris and contaminants from pool surfaces!

The Aqua Smart Gyro System is an intelligent program for robotic pool cleaners. The smart algorithm installed in the brain of the cleaner enables the robot to cover the pool in a systemized fashion, without wasting time. Additionally, The Prime can change direction on the pool's bottom which helps enable one of the fastest and most efficient cleaning methods in the industry.
