POWERFUL SUCTION. FAST CLEANING. INTELLIGENT.

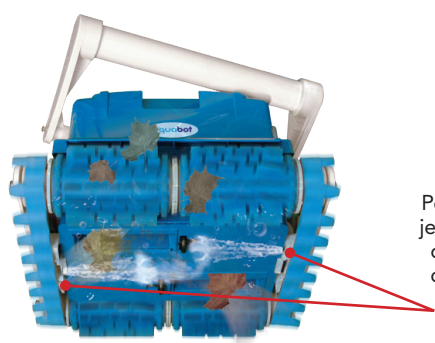

The Aquabot Turbo T2 Plus is designed to clean residential In-Ground Pools of all sizes and surfaces. The Aquabot Turbo T2 Plus provides intelligent cleaning for your in-ground pool by spending most of its time on the bottom where the majority of the dirt can be found. It cleans the pool floor, walls and waterline.

Patented Power Washing Jets pressure wash the pool surfaces to loosen stubborn debris and algae. They also clean the hard to get nooks and crevices that standard brushes can't reach.

This cleaner is equipped with NeverStuck™ Rollers to help overcome main drains and other obstacles, as well as G-Tooth™ tracks to protect your cleaner from excessive rubbing against pool sides.

KEY FEATURES

- Extra Long 60' Cable with Swivel
- Patented Power Washing Jets
- 2 Cleaning Cycles
 1. Pool Floor, Wall and Waterline
 2. Floor Only
- Programmable for External Timer*
- Free Caddy Included!

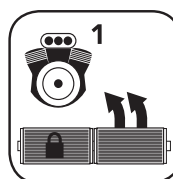

Power washing jets deep clean dirt that other cleaners leave behind.

FEWER CHEMICALS AND A HEALTHIER CLEAN.
