

CCH[®] Endurance System

Commercial Pool & Spa Water Sanitation System

The CCH[®] Endurance system is an innovative approach to commercial pool chlorination. The patent-pending, slow dissolving tablets work with our easy to use CCH[®] Endurance feeder, an automatic solution that meets the needs of the modern pool facility. With the simplicity of an erosion feeder, the CCH[®] Endurance feeder's streamlined design is easy to install, service and requires minimal operator attention. There's never been a better time to upgrade to the latest in high-tech pool performance-delivering clear and sparkling water time and time again.

Powerful Performance

- 3-in-1 product that:
- Chlorinates consistently
- Increases calcium to protect plaster
- Increases alkalinity to stabilize pH
- Adds no cyanuric acid to your pool for less wasteful drainage
- Dissolves slowly to give long lasting action
- Tablets work with ORP sensors

Formulation Efficiencies

- Highly concentrated, to reduce shipping and handling costs
- Will not cause reduction of ORP
- More concentrated than liquid bleach
- Class 2 oxidizer

The Centers for Disease Control and Prevention (CDC) does not allow the use of stabilized sanitizers such as trichlor and dichlor for shocking a pool after a fecal accident (Model Aquatic Health Code (MAHC) 6.5). CCH[®] Endurance non stabilized tablets do not contain cyanuric acid which slows down the kill rate of chlorine for pathogens such as *Cryptosporidium*. According to the MAHC, crypto remediation with chlorine cannot be conducted with >15 ppm CYA. CCH[®] Endurance, the superior choice to kill harmful germs that can cause waterborne illnesses.

- Longer shelf life when compared to liquid bleach
- Adds less total dissolved solids (TDS) than liquid bleach

FEEDER & TABLET SPECIFICATIONS >

Use ONLY with CCH[®] Endurance Chlorinating Tablets

Dimensions

Feeder dimensions (max)	.Width: 12" (30.48 cm)
	.Depth: 13" (33.02 cm)
	.Height: 31" (78.74 cm)
Weight (empty)	. 15 lbs (6.80 kg)
Tubing size (0.D.)	.5/8" (15.87 mm)

Capacity

Capacity (weight of tablets) 6.4 lbs (2.90 kg)

Tablet Specifications

Active Ingredient	.Calcium Hypochlorite
Available Chlorine	.68%
Weight	.265 gms
Diameter	. 2.7"
Color	. Blue
Container	.25 lb pails

Construction

- unique thread design creates positive seal
- snap feature indicates the lid is tightened completely
- easy to load cartridge
- drain port to prevent spills
- inlet and outlet ports use standard 5/8" tubing
