

CHLOR BRITE®

Sanitizer

Quick-Dissolving Concentrated Chlorinating Granular

- For use in all types of pools & spas
- Kills bacteria & algae
- Use for shocking or everyday chlorination

Active Ingredient:

Sodium dichloro-s-triazinetriene dihydrate 99%

Other Ingredients: 1%

Total 100%

(Available Chlorine — 55%)

FIRST AID	
If in Eyes	<ul style="list-style-type: none"> • Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. • Call a poison control center or doctor for treatment advice.
If on Skin or Clothing	<ul style="list-style-type: none"> • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes. • Call a poison control center or doctor for treatment advice.
If Inhaled	<ul style="list-style-type: none"> • Move person to fresh air. • If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. • Call a poison control center or doctor for further treatment advice.
If Swallowed	<ul style="list-style-type: none"> • Call poison control center or doctor immediately for treatment advice. • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by a poison control center or doctor. • Do not give anything by mouth to an unconscious person.
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For medical emergencies, call the Poison Control Center at 1-800-222-1222.	
NOTE TO PHYSICIAN	
Probable mucosal damage may contraindicate the use of gastric lavage.	

PRECAUTIONARY STATEMENTS HAZARD TO HUMANS AND DOMESTIC ANIMALS

DANGER. Highly Corrosive. Causes irreversible eye damage and skin burns. Harmful if swallowed. Irritating to nose and throat. Do not get in eyes, on skin or clothing. Wear protective eyewear (goggles or safety glasses). Wear protective clothing and rubber gloves when handling this product. Avoid breathing dust and fumes. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, smoking tobacco or using the toilet. Remove contaminated clothing and wash clothing before reuse.

ENVIRONMENTAL HAZARD: This pesticide is toxic to fish and aquatic organisms.

PHYSICAL OR CHEMICAL HAZARD: Strong oxidizing agent. Do not mix with other chemicals. **Never add water to product.** Always add product to large quantities of water. Use only clean, dry

utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic material or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible fire or explosion. Avoid contact with flaming or burning material, such as a lighted cigarette. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open and well-ventilated area and flood with large amounts of water.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **Leslie's Swimming Pool Supplies Chlor Brite** is designed to dissolve quickly and completely providing a steady source of available chlorine to control growth of algae, kill bacteria and destroy organic contaminants.

READ ALL PRECAUTIONARY STATEMENTS BEFORE USE SWIMMING POOLS

HOW TO USE: Broadcast **Leslie's Swimming Pool Supplies Chlor Brite** evenly over a wide area in the deepest part of the pool with the circulation pump running. To prevent bleaching or damage to the pool surface, use a pool brush to disperse any granules that may have settled to the bottom of the pool.

ROUTINE USE: Broadcast 3 ounces of **Leslie's Swimming Pool Supplies Chlor Brite** per 10,000 gallons of pool water every other day, or as needed, to maintain a Free Available Chlorine (FAC) level of 1-4 ppm. This quantity may vary based upon bather load, water temperature and other conditions. Test the Free Available Chlorine (FAC) level with a reliable test kit. If starting up the pool, repeat the dosage until the Free Available Chlorine (FAC) level is 1-4 ppm. Maintain pH between 7.2-7.8 (ideal pH is 7.4-7.6). Total Alkalinity between 80-120 ppm depending on type of primary sanitizer used (80-100 ppm for sodium hypochlorite, calcium hypochlorite or lithium hypochlorite and 100-120 ppm for dichlor, trichlor or bromine tablets) and Calcium Hardness level between 200-400 ppm. To remove excessive organic materials and keep the water sparkling clear, superchlorinate weekly with 11 ounces of **Leslie's Swimming Pool Supplies Chlor Brite** per 10,000 gallons of pool water. (This dosage provides approximately 6.8 ppm of Free Available Chlorine). Follow "HOW TO USE" instructions above. You may only need to superchlorinate every other week if your water temperature is below 80°F. Do not reenter swimming pool until the Free Available Chlorine level is between 1-4 ppm.

SUPERCHLORINATION: In case of algae, colored water, unpleasant odors, burning eyes, excess bather load, heavy rains and winds, or high temperatures, superchlorination may be required. Adjust the pH to 7.2-7.6 with the appropriate product. Follow the label directions. Add 21 ounces of **Leslie's Swimming Pool Supplies Chlor Brite** per 10,000 gallons of pool water to remove excessive organic materials and keep the water sparkling clear. (This dosage provides approximately 6.8 ppm of Free Available Chlorine). Follow "HOW TO USE" instructions above. Do not reenter the swimming pool until the Free Available Chlorine level is between 1-4 ppm. If algae are visible, brush pool surfaces and vacuum. Repeat treatment the following day, if necessary. You may only need to superchlorinate every other week if your water temperature is below 80°F.

SPAS AND HOT TUBS: Each half ounce of **Leslie's Swimming Pool Supplies Chlor Brite** will provide approximately 4 ppm Free Available Chlorine (FAC) in 500 gallons of water. Using an appropriate test kit, test and adjust the water to the following values: pH 7.2-7.8 (ideal pH is 7.4-7.6), Total Alkalinity 80-120 ppm and Calcium

Hardness 200 ppm minimum. Maintain these levels for proper spa and hot tub operation by frequent testing with a test kit. Do not allow the cyanuric acid level to exceed 150 ppm. It is recommended that spas and hot tubs be drained every 30-90 days, more often under heavy use. Consult manufacturer's recommendations concerning the compatibility of chlorine sanitizers with their equipment. Some oils, lotions, fragrances, etc. may cause foaming or cloudy water and may react with chlorine sanitizers reducing their effectiveness.

START-UP (FRESHLY FILLED): 1. Turn on the circulation pump and ensure that it is operating properly. 2. Add one ounce of **Leslie's Swimming Pool Supplies Chlor Brite** for each 500 gallons of water. Test the Free Available Chlorine (FAC) level and, if below 3-5 ppm, add additional **Leslie's Swimming Pool Supplies Chlor Brite** until the FAC level reaches 3-5 ppm as determined by a reliable test kit.

ROUTINE USE: 1. Turn on the circulation pump and ensure that it is operating properly. 2. Broadcast a half-ounce of **Leslie's Swimming Pool Supplies Chlor Brite** (per 500 gallons) over the surface of the water. Test the Free Available Chlorine (FAC) level and add additional **Leslie's Swimming Pool Supplies Chlor Brite**, if necessary, to attain a 3-5 ppm FAC level. 3. Maintain a 3-5 ppm FAC level while the spa or hot tub is in use. 4. After each use, superchlorinate with 1.5 ounces per 500 gallons of **Leslie's Swimming Pool Supplies Chlor Brite** to control odors and algae. Do not reenter spa or hot tub until the FAC is between 3-5 ppm as measured by a reliable test kit.

EXTENDED NON-USE PERIOD: During extended periods when the spa or hot tub is not being used, broadcast a half-ounce of **Leslie's Swimming Pool Supplies Chlor Brite** (per 500 gallons) over the surface of the water twice a week or as needed to maintain a 3-5 ppm FAC level.

STORAGE AND DISPOSAL:

Do not contaminate water, food or feed by storage or disposal. **STORAGE:** Keep product dry in its original, tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. Storage area should be locked and inaccessible to children. **PESTICIDE DISPOSAL:** Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. **CONTAINER DISPOSAL:** Nonrefillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Offer for recycling if available.
