

Cyclone Pro Air Blower

The new 3.0 hp Cyclone Pro is the most powerful blower/vac on the market today. The Cyclone's powerful 2 stage motor can generate 140 cfm on open flow and a sealed pressure of 180 inches of water. More than enough power to winterize a 9 ft deep pool or to pull back a pool liner on a cold spring day. The housing is redesigned into a smaller package with a dual sized inlet to accommodate a 4.0 inch flex hose or a 2.0 inch pvc pipe. There is also a protective stainless steel screen on the inlet to prevent large debris from entering the blower. The outlet has a 1.5 inch threaded fitting to allow for multiple pvc fittings.

Other features include:

- 20 amp water resistant on/off rocker switch with 6ft grounded power cord.
- Powerful long life bypass motor rated at 14.0 amps at 120 volts.
- Rugged housing with built in handle and rubber feet.
- 1.5 inch hose fitting included in box.

Model 14128100P

Size: L x W x H

13" x 9.25" x 13.5"

Weight: 14 lbs

* 4.0" vacuum liner hose sold separately
