

the filter fiber stuff[™]

- super concentrated, can be used as a safe alternative to DE, requires less than half the amount of product (by weight) than needed when using DE.
- can be used to enhance filtering performance of sand and cartridge filters as well.
- non-toxic, biodegradable, extends filter runs, and can be backwashed safely.

SIZES

9 oz. 22 lbs.
18 oz. 44 lbs.
36 oz.

JACK'S MAGIC® THE FILTER FIBER STUFF™

The Filter Fiber Stuff combines high performance, outstanding value, and environmentally friendly features into one great product. When used as a safe alternative to DE in DE filters, **The Filter Fiber Stuff** requires less than half the amount of product (by weight) than needed when using DE. It can be used to enhance the filtering performance of sand and cartridge filters as well.

DIRECTIONS FOR USE

FOR USE WITH PRESSURE D.E. FILTERS:

Dosage: Add 1 DE scoop of **The Filter Fiber Stuff** per 12 sq ft. of filter area.

Charging: Start with a clean filter, not the filter operating pressure before **The Filter Fiber Stuff** is added; this will be your clean filter operating pressure. Next, create a slurry. Slowly add the solution through the skimmer with the pool pump in operation.

Cleaning: The filter should be cleaned when the filter pressure rises 10 pounds above the clean filter operating pressure, or when the flow back into the pool is diminished. It is important to clean the filter as needed and recharge it each time with **The Filter Fiber Stuff**.

FOR USE WITH CARTRIDGE FILTERS:

Dosage: Add 3 ounces (by weight) of The Filter Fiber Stuff per 25 sq. ft. of filter area.

Charging: Start with a clean filter. Note the filter operating pressure before **The Filter Fiber Stuff** is added; this will be your clean filter operating pressure. Next, create a slurry. With the pool pump on, slowly add the solution into the skimmer. This may cause a 1-3 pound (PSI) rise in filter pressure. Leave **The Filter Fiber Stuff** on the cartridge and operate the pool as normal.

Cleaning: The filter should be cleaned when the filter pressure rises 10 pounds above the clean filter operating pressure, or when the flow back into the pool is diminished.

FOR USE WITH SAND FILTERS:

Dosage: Add 3 ounces (by weight) of **The Filter Fiber Stuff** at a time, with a maximum of 9 ounces (by weight).

Charging: Start with a clean filter. Note the filter operating pressure before **The Filter Fiber Stuff** is added; this will be your clean operating pressure. Next, create a slurry. With the pool pump in operation, slowly add the 3 ounce (by weight) **The Filter Fiber Stuff** slurry in to the skimmer, until you see a 2 PSI increase on the pressure gauge, or until a maximum of 9 ounces (by weight) has been added.

Cleaning: Backwash **The Filter Fiber Stuff** from the filter when the pressure rises 10 pounds above the clean filter operating pressure, or when the flow back in the pool is diminished. **The Filter Fiber Stuff** must be backwashed from the filter after a maximum of 24 hours of operation time. Clean filter and recharge as necessary.
