

# Introducing FilterBalls Blü™

## The Pool & Spa Filtration Breakthrough!

- Superior filtration at 15 microns
- 100 times lighter than sand
- A fraction of the cost compared with D.E. and cartridge systems
- Dramatically reduce electricity use and improve pump life
- Environmentally friendly
- Enjoy a clean system without the grit and mess associated with sand

**FilterBalls Blü uses  
your current sand  
filtration system!**

# Blü™

RATED AT 15 MICRONS

## Clean Tech Water Filtration Has Arrived!

### Pool & Spa Water Filtration

- Superior water clarification.
- Rated to 15 microns at 95% removal during first pass. Better than sand!
- Use your existing sand filter housing.

### Lightweight

- 100x lighter than sand filter media.
- Just one pound of FilterBalls replaces 100 pounds of sand.
- Eliminate hauling and disposal of hundreds of pounds of sand.

### Saves Money

- FilterBalls cost less than premium filter sands.
- One 1-pound bag replaces two 50-pound bags of sand,
- Save on shipping.
- Save time and effort on service, less mess.
- Gain increased pump flow which leads to less run time. Save electricity!

### Improves Operations

- Back-washable and long lasting.
- Much lower system pressure required.
- Longer pump life.

### Better for the Environment

- 100% recyclable and green!
- Recycle your FilterBalls every three to five years.

## THE PROBLEM:

Pools and spas present challenges because organic material such as dead skin, hair, body oils, suntan lotions, pollens, and other unwanted substances are regularly introduced in warm pools and spas. These are conditions where bacteria and molds can thrive and water quality can quickly depart from acceptable ranges. Proper chemical treatment, water replacement and superior filtration systems are your best defense for enjoying a germ-free and balanced pool or spa system.

### The Trouble with Sand

**Sand filtration limits your ability to combat these very small particles** because filtration is no smaller than 20 microns. 20 microns is about 1/3 the width of a human hair and too large to capture most bacteria. Sand also degrades with time reducing filtration performance with every year of use.

### The Expense of D.E. and Cartridge Systems

Pool and spa owners often seek alternatives such as D.E. and cartridge filters that provide superior filtration performance over sand. However, **D.E. systems and cartridges are much more expensive to purchase, maintain, and replace.** Also, using these filter systems require replacing your housing and potentially new pumps.

## THE SOLUTION:

### FilterBalls Filtration Breakthrough

**FilterBalls provides your best option for superior filtration** matching the abilities of D.E. and cartridge systems while offering your most cost effective solution with far more filtration area. **You use your existing sand filter system** and should not need to make any changes to your equipment.

FilterBalls Blü is our recommended filter media for pools and spas. It is lightweight, the lowest cost media, and matched with the needs of most pool and spa owners. FilterBalls will last for years and prolong pump life by reducing stress on your system.

### Lightweight, More Efficient and More Cost Effective

Plain and simple, **FilterBalls is a lightweight replacement for filter sand.** There is less work for you. It continuously saves you money in maintenance. And, you will enjoy the benefits of healthy, clean, crystal-clear water in your pool and spa.

## 100 Times Lighter versus Traditional Filter Sand

3 cubic feet of FilterBalls

**3 pounds**

3 cubic feet of sand

**300 pounds**

## Unprecedented Performance vs. Other Media

CHARACTERISTICS	FILTERBALLS	SAND	ZEOLITE	MYSTIC WHITE
Weight/ft <sup>3</sup> Dry	1 lb	100 lbs	50 lbs	105 lbs
Weight/ft <sup>3</sup> Wet	1.1 lbs	150-175 lbs	80 lbs	150-175 lbs
Flux Rate/ft <sup>2</sup> Media	7-30 gpm	3-10 gpm	12-20 gpm	3-10 gpm
Micron Removal 95%	10 microns	35 microns	5-20 microns	30 microns
Initial Differential Pressure	<1.0 Psid	7-15 Psid	10-15 Psid	7-15 Psid
MSRP	\$49.50 (1 bag)	\$51.00 (2 bags)	\$54.00 (2 bags)	\$52.00 (2 bags)
