Corrosive solid, acidic, inorganic, n.o.s.

(MONOPERSULFATE COMPOUND)

PRECAUTIONARY STATEMENTS

DANGER: CORROSIVE. CAUSES SKIN AND EYE DAMAGE. May be harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, smoking tobacco, or using the toilet. Remove and wash contaminated clothing after use.

IF INHALED:

- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
- Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

DIRECTIONS FOR USE

It is a violation of State Law to use this product in a manner inconsistent with its labeling.

Read entire label and use in accordance with the precautionary statements and directions.

This product is not a sanitizer or algicide. For control of microorganisms in swimming pools or for algae control, use an EPA registered pesticide. Regular use of **Fresh 'N Clear'** will oxidize most of the non-living contaminants that accumulate in swimming pool water. The elimination of these materials will greatly reduce the formation of "combined chlorine" and "combined bromine" compounds. **Fresh 'N Clear'** will also react with any non-living contaminants which exert a chlorine or bromine demand and regular use will insure that the specific sanitizer used to disinfect the pool water will remain in the pool in its "free" and "active" form. This oxidizing action, combined with a special water clarifying ingredient, will keep your pool smelling fresh and looking clear. **Fresh 'N Clear'** contains no chlorine or other disinfectant and must be used for non-living matter "SHOCK" TREATMENT ONLY. **Fresh 'N Clear'** contains a unique clarifying additive leaving your pool water fresh and clear. For routine disinfection of the pool water, use any registered disinfectant according to its directions. **DO NOT** use **Fresh 'N Clear'** in Baquacil® or biguanide-treated pool water.

HOW TO USE:

1. For the initial treatment, to insure "break-through" oxidation, use **Fresh 'N Clear'** at the rate of two pounds (2 lbs.) per 10,000 gallons of water.
2. Subsequent treatment for most residential pools with normal bathing loads must be made once per week at the rate of one pound (1 lb.) per 10,000 gallons of water.

FIRST AID

IF IN EYES:

- Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
- Call a poison control center or doctor for treatment advice.

IF SWALLOWED:

- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to by a poison control center or doctor.
- Do not give anything to an unconscious person.

IF ON SKIN OR CLOTHING:

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

3. For semi-commercial pools or pools with large amounts of non-living contaminants, more frequent treatment may be required.

HOW TO APPLY:

Broadcast the required amount of **Fresh 'N Clear'** uniformly over the surface of the water, adding about two-thirds of the total dose over the deep end of the pool. Apply with the filter running to insure complete mixing and good circulation.

Application must be made when no swimmers are in the pool, preferably at night. However, since **Fresh 'N Clear'** contains no chlorine, there is no extended waiting period before swimming may be resumed.

STORAGE AND DISPOSAL

STORAGE: Keep this product in its original, tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. Storage area should be locked and inaccessible to children.

CONTAINER DISPOSAL: Do not reuse empty container. Thoroughly rinse empty container with water then place in trash or offer for recycling if available.
