

PowerFlo

ABOVE-GROUND/IN-GROUND POOL PUMP SERIES

II™

High performance and quiet operation

- Self-priming
- Heavy-duty motor with stainless steel motor shaft and automatic thermal overload protector for maintenance-free operation
- Exclusive corrosion-proof PermaGlass XL™ housing for all-weather performance and quiet operation
- 100% drip proof, heat-resistant double sized seal for long motor life
- Unique, integral diffuser ensures rapid priming
- Drain plug for easy maintenance of pump

ABOVE-GROUND/IN-GROUND POOL PUMP SERIES

The Power-Flo II is a versatile, high-performance self-priming pump designed to meet the varying specifications of mid-sized in-ground, above-ground and on-ground swimming pools.

The Power-Flo II incorporates features such as a massive 118 cubic-inch strainer basket, a heavy duty motor with stainless steel shaft, and a quick-release "see-thru" strainer cover. Features usually found only on higher priced in-ground pumps.

Durable and economical, the Power-Flo II continues to set the standard for value and performance in pumps.

Super-size 118-cubic-inch basket has extra leaf-holding capacity and extends time between cleanings. Rigid construction with load-extender ribbing ensures free-flowing operation for heavy debris loads.

Power-Flo II Specifications

Model	Motor HP	Power KW	Inlet/Outlet	Description
