JSF26 26" FILTER

The Jacuzzi® JSF26 sand filter offers extraordinary reliability with low maintenance, allowing the high performance unit to filter your pool for many years. Our sand filter can withstand high flow rates without reducing filtration to keep your water crystal clear. It includes an easy-to-use 7-way multi-port valve with filter; backwash, rinse, recirculate, waste, and closed positions engineered to minimize resistance through the filter. Manufactured in the U.S.A.
