// POOL CLEANING SYSTEM
ABOVE-GROUND POOL
ROBOTIC

TWO CLEANING CYCLES
SMALL POOL (1 HOUR) AND
LARGE POOL (2 HOURS)

Jacuzzi® JAG

Above-Ground Robotic Cleaner

The Jacuzzi JAG above-ground robotic cleaner provides simple operation for pool cleaning coverage. Using hydraulic propulsion technology to traverse your pool's floor and cove, the JAG robotic cleaner offers two cleaning cycles to clean small pools in just an hour and large pools in two hours. The JAG robotic cleaner uses two internal debris bags to easily collect large and small debris throughout the pool.

TWO CLEANING CYCLES

Small Pool (1 hour) and Large Pool (2 hours)

HYDRAULIC PROPULSION

Adjusts direction of water flow to move the cleaner

TWO DEBRIS BAGS

Two debris bags for excellent collection of large and fine debris

ADJUST TURNING

Control cleaner direction and limit cord tangling with a simple adjustment of the locking pin

FAST & EASY SETUP

Attach the power cord. Turn on the power. Select cleaning cycle and press start
