

POWER POWDER® GRANULAR 70

Shock

Product Representation

Keep Out of Reach of Children

DANGER

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

IN CASE OF EMERGENCY CALL: 1-800-654-6911

FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

Concentrated Chlorinating Agent

- 70% active ingredient
- Quick dissolving
- Kills bacteria, controls algae and destroys organic contaminants

Active Ingredient:	
Calcium Hypochlorite	70%
Other Ingredients:	30%
Total	100%

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Irritating to nose and throat.

- Do not get in eyes, on skin, or clothing. Do not handle with bare hands. Wear protective eyewear and rubber gloves when handling this product. For additional skin protection, wear long sleeves and long pants.
- Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove and wash contaminated clothing before reuse.
- Only use utensils that are thoroughly clean and dry.

PHYSICAL AND CHEMICAL HAZARDS: If product is exposed to small amounts of water, it can react violently to produce heat and toxic gases and spatter. Do not add water to this product. Add only into water.

- Do not allow to become wet or damp before use.
- Do not mix this product with a small amount of water. Only add this product directly to your pool.

Can react with other materials, including other water treatment products, to cause intense fire, explosion, and the release of toxic gases.

- Keep all foreign matter, including other water treatment products, away from this product.
- Do not allow this product to contact other water treatment products. Do not use this product in a floater or feeder that has been used with any other product. If used with a skimmer, make sure skimmer is completely clean and free of residue from other water treatment products before putting this product in a skimmer.
- **Exposure to heat can cause this product to rapidly decompose, leading to intense fire, explosion, and the release of toxic gases.**
- Store in a cool, dry, well-ventilated area.
- **Strong oxidizing agent. This product can increase fire intensity.** Keep away from heat and from flame and burning material (like a lighted cigarette).

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, ponds, streams, estuaries, oceans or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ALL PRECAUTIONARY STATEMENTS BEFORE USE

SWIMMING POOL USES

WHY YOU SHOULD USE THIS PRODUCT: This is a highly effective, multi-purpose product that sanitizes, clarifies, prevents algae and shock treats your pool. It is convenient, easy to use, and won't over-stabilize your pool. Additional shocking to keep water clean and clear is recommended after: rain and heavy winds, high number of swimmers, increased water temperature, and/or increased frequency of pool usage.

HOW TO USE: Do not pre-mix this product before adding it to your pool. Only add this product directly to your pool or skimmer. Use only a clean, dry scoop to measure this product. Do not use the scoop for any other purpose.

METHOD FOR DOSING DIRECTLY INTO POOL: Add the recommended dosage of this product during evening hours while the filter pump is running. When adding this product to your pool, broadcast the product evenly over a wide area in the deepest part of

the pool. If any granules settle to the bottom of the pool, use brush to disperse.

METHOD FOR SKIMMER ADDITION: Use this method to avoid bleaching vinyl liner or paint. Make sure that filter pump is on and properly recirculating through skimmer. Empty skimmer of all chemicals and/or debris. Contamination may cause an explosion or the release of toxic gases. Do not use this method when an automatic chemical dispensing device (e.g. feeder) is present. Pour this product slowly into skimmer, making sure that the material is drawn into the system at the same rate; do not allow this material to accumulate as toxic gases may be generated.

WATER BALANCE: For best product performance, swimmer comfort, and crystal clear water. Maintain total alkalinity in the range of 60 to 120 parts per million (ppm). Maintain pH in the range of 7.2 to 7.6. Maintain calcium hardness above 200 ppm. Use a reliable test kit that measures all these ranges. Use Leslie's Pool Care Products to make adjustments. Follow label directions for each product. Adjust your alkalinity levels first before adjusting your pH levels.

OPENING YOUR POOL: For best results, see the "WATER BALANCE" section before treatment. Always adjust and maintain pH in the 7.2 to 7.6 range. Follow "SHOCK TREATMENT / SUPERCHLORINATION" directions on this package. Allow 30 minutes for product to disperse. Test free available chlorine residual with a pool test kit. Repeat treatment as needed. Re-entry into treated pools is prohibited above levels of 4 ppm due to risk of bodily harm.

ROUTINE CHLORINATION: For best results, see "WATER BALANCE" section before treatment. Throughout the pool season, adjust and maintain pH at 7.2-7.6. Check available chlorine with a suitable test kit.

FOR UNSTABILIZED POOLS: Add 6-8 ounces of this product per 10,000 gallons of pool water daily or as often as needed to maintain the free available chlorine residual at 1 - 4 ppm. Follow "HOW TO USE" directions on this package. **FOR POOLS STABILIZED USING LESLIE'S STABILIZER AND CONDITIONER:** Add 3-4 ounces per 10,000 gallons every other day or as often as needed to maintain the free available chlorine residual at 1-4 ppm. Follow "HOW TO USE" directions on this package. Re-entry into treated pools is prohibited above levels of 4 ppm due to risk of bodily harm.

SHOCK TREATMENT/SUPERCHLORINATION: For best results, see "WATER BALANCE" and "HOW TO USE" sections before treatment. Every 7 days, or as necessary to prevent pool problems, shock treat / super chlorinate the pool by adding 10-20 ounces of this product per 10,000 gallons of water to provide 5 to 10 ppm available chlorine. Additional shock treatments may be required to correct problems which are caused by visible algae, high bathing loads, heavy wind and rainstorms. Additional shock treatments may also be required to correct problems such as unpleasant odors and eye irritation. Check the available chlorine with a suitable test kit. Re-entry into treated pools is prohibited above levels of 4 ppm due to risk of bodily harm.

ALGAE CONTROL: Follow "SHOCK TREATMENT/SUPERCHLORINATION" directions on this label. Add this product as close as possible to any algae on the sides or bottom of the pool. If necessary, repeat the treatment. To prevent possible staining or bleaching, take the following steps immediately after treatment: Thoroughly clean pool by brushing surface of algae growth, vacuum and cycle through filter. For preventative algae control, use your preferred Leslie's Algaecide Product regularly. Follow label directions on the algaecide. Re-entry into treated pools is prohibited above levels of 4 ppm due to risk of bodily harm.

WINTERIZING: For best results, see "WATER BALANCE" section before treatment. Gradually add 30 ounces of this product per 10,000 gallons of pool water that is clear and clean. This provides 16 ppm free available chlorine. Follow "HOW TO USE" directions on this package. Run the filter pump until granules are completely dissolved. Cover the pool with a pool cover. Prepare the heater, pump and filter components for winterizing by following manufacturer's directions.

TO DETERMINE YOUR POOL CAPACITY IN U.S. GALLONS, USE THE APPROPRIATE FORMULA BELOW:

SHAPE OF POOL	GAL. OF WATER (Dimensions in feet)
Rectangular	Length x Width x Average Depth x 7.5
Round	Diameter x Diameter x Average Depth x 5.9
Oval	Maximum Length x Maximum Width x Average Depth x 5.9
Free Form	Surface Area (Sq. Feet) x Average Depth x 7.5

SPAS / HOT TUB USES
HOW TO USE: For best results, see "WATER BALANCE" section before treatment. Maintain these conditions for proper operation by frequent testing with a test kit. Do not allow cyanuric acid level to exceed 100 ppm. It is recommended that spas and hot tubs be drained every 30-90 days, more often under heavy use. Consult manufacturer's recommendations concerning the compatibility of chlorine sanitizers with their equipment. Some oils, lotions, fragrances, cleansers, etc., may cause foaming or cloudy water and may react with chlorine sanitizers to reduce their efficacy. If circulation is low, stir water after addition of chlorine or other chemicals.

WATER BALANCE: For best product performance, comfort, and crystal clear water. Maintain total alkalinity in the range of 60 to 120 parts per million (ppm). Maintain pH in the range of 7.2 to 7.6. Maintain calcium hardness above 200 ppm. Use a reliable test kit that measures all these ranges. Use Leslie's Spa Care Products to make adjustments. Follow label directions for each product. Adjust your alkalinity levels first before adjusting your pH levels. Re-entry into treated spas is prohibited above levels of 5 ppm due to risk of bodily harm.

OPENING YOUR SPA (FRESHLY FILLED): For best results, see "WATER BALANCE" section before treatment. Turn on circulation system and ensure that it is operating properly. Add one (1) ounce of this product to provide approximately 10 ppm available chlorine for each 500 gallons of water. Check the free available chlorine (FAC) and if less than 3 ppm, repeat as needed. Reentry into treated spas is prohibited above levels of 5 ppm due to risk of bodily harm.

ROUTINE CHLORINATION FOR REGULAR USE: For best results, see "WATER BALANCE" section before treatment. Turn on circulation system and ensure that it is operating properly. Scatter 0.3-0.5 ounces (1/2 - 3 teaspoons tsp) of this product per 500 gallons over the surface of the water. Test for free available chlorine and add additional product if necessary to maintain 3-5 ppm FAC while unit is in use.

SHOCK TREATMENT / SUPERCHLORINATION: After each use, shock treat with one (1) ounce of this product to provide approximately 10 ppm available chlorine per 500 gallons of water, to control odors and algae. Repeat as needed.

EXTENDED NON-USE PERIOD: For best results, see "WATER BALANCE" section before treatment. During extended non-use periods when the unit is not being used add 0.5 ounce (3 tsp) of this product per 500 gallons twice a week with the circulation system running or as needed to maintain 3-5 ppm free available chlorine.

STORAGE & DISPOSAL:

Keep this product dry in its tightly closed container when not in use. Store in a cool, dry, well-ventilated area. Keep away from heat or open flame. Nonrefillable container. Do not reuse or refill this container. Rinse empty container thoroughly with water to dissolve all material prior to disposal. Offer for recycling if available. Do not contaminate food or feed by storage or disposal or cleaning of equipment. FOR DISPOSAL OF A CONTAMINATED OR DECOMPOSING PRODUCT SEE "EMERGENCY HANDLING."

EMERGENCY HANDLING: In case of contamination or decomposition - Do not reseal container. Immediately remove container to an open and well-ventilated outdoor area by itself. Flood with large amounts of water. Dispose of the container and any remaining contaminated material in an approved landfill area.
