| Battery Life | 180 Minutes |
| Charging Time | 3-4 Hours |
| Filtration Level | Fine Filter Basket – For everyday debris MicroMesh™ Ultra-Fine Filter (3µm) – For finer particles |

WavePath™ Navigation Technology

Utilizing advanced WavePath™ technology, the Scuba N1 Plus intelligently assesses its position in the pool and selects optimal cleaning paths for a thorough and effective clean across all pool surfaces. This innovative navigation ensures no area is missed, maximizing cleaning efficiency.

Periodic Cleaning

With Scuba N1's periodic cleaning feature, your Aiper device automatically cleans for 45 minutes every 48 hours before entering low power mode. This allows it to keep your pool clean and swim-ready throughout the week, so you're always ready for a dip by the weekend.

Replaceable MicroMesh™ Ultra-fine Filter

The MicroMesh Ultra-fine Filter enhances the Scuba N1's cleaning efficiency, capturing even the finest debris, such as sand, dust particles, and microscopic impurities. This replaceable 3µm filter ensures optimal performance, preventing clogs and maintaining long-lasting cleaning results for a consistently spotless pool.

Superior Obstacle Traversal for Edge-to-Edge Cleaning

The Scuba N1 Plus features robust caterpillar treads designed to provide better traction, mobility, and obstacle traversal. This ensures seamless movement along the floor and walls of your pool, delivering an edge-to-edge clean with ease and efficiency.

OTA Upgrades with the Aiper App

The Aiper app offers continuous OTA (Over-The-Air) updates, ensuring your Scuba N1 Plus is always equipped with the latest features. These updates improve path planning and ensure that your pool remains in pristine condition with every clean.
