

Problem Klear Algaecide Instructions

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. **WAIT ONE HOUR AFTER APPLICATION BEFORE SWIMMING.** This product is used to control and prevent algae growth and to maintain clear water in swimming pools using chlorinating systems.

INITIAL TREATMENT: For pools using chlorinating disinfection systems. Use to start a preventative treatment program with SeaKlear Problem Klear Algaecide. For each 10,000 gallons of swimming pool water, add 6 fl oz of this product directly to the water. Follow the Initial Treatment directions on the chlorinating compound product label. **Do not mix this product directly with chlorinating compounds.** **Wait at least 1 hour after SeaKlear Problem Klear Algaecide treatment before entering pool** or follow the required waiting period for a product used with this product, if greater than 1 hour.

>

Size of pool	Amount of SeaKlear Problem Klear
10,000 gallons	6 ounces
15,000 gallons	9 ounces
20,000 gallons	12 ounces

MAINTENANCE TREATMENT:

For pools using chlorinating disinfection systems. Use bi-weekly, or as needed to keep water free of algae. Add chlorinating compound as directed on product label for appropriate size of swimming pool. Add the following amount of this product when adding a chlorinating compound. **Wait at least 1 hour after SeaKlear Problem Klear Algaecide treatment before entering pool** or follow the required waiting period for a product used with this product, if greater than 1 hour.
