

TUSCANY

injection molding

all the components of the resin pool structure are molded by an injection process that enables us to reinforce every one of these components, to curve of the top ledge and also, to use a sturdy snap-on process that eliminates most of the hardware. All resin components are colorfast throughout and duraflex filled.

resin top ledges 7"

curved top ledges offer a perfect look and an outstanding rigidity

ledge covers

perfectly adjust to the upright while insuring the pool's circular orientation

resin uprights

have a profiled and harmonious design for better rigidity and perfect look

stabilizers & bottom rails

Resin stabilizers safely secure the liner into position and stabilize the wall. Oversized resin bottom rails helps to lock the wall into place and permits stability despite ground changes.

yardmore buttress free oval system

This streamlined system was designed to use less space in your backyard.

A structurally simplified design with the superior strength and durability of our traditional construction that is both efficient and attractive.

Salt friendly!
