

Aquabot TURBO

RESIDENTIAL ROBOTIC POOL CLEANERS

At the Touch of a Button...

Scrubs, Vacuums & Microfilters;
Without Hoses, Pool Filter, Booster Pumps or You!

Aquabot Turbo® climbs 90° angles from floor to waterline, including most stairs and benches, to automatically clean pools up to 50' in length in just 3 to 4 hours or less. Aquabot Turbo® is even equipped with an adjustable timer for customized cleanings and can operate with "auto-controller systems." Compare Aquabot Turbo® to any other cleaner and see why it's the world's #1 selling robotic cleaner!

Just drop it in and press a button!
No hoses to untangle, no costly booster pumps to run, and no filter connections to slow you down.

With Aquabot Turbo® you get:

- Total maintenance cost savings of up to 50% (chemicals, water, energy)
- Complete cleaning of pools up to 50' in length
- Dual rotating scrubbing brushes loosen stubborn debris from all pool surfaces including waterline
- Offset vacuum ports for clog-free operation and better corner access
- 23-Quart capacity reusable internal filter - more dirt and debris with less bag cleaning
- Filters down to 2 microns; Cuts filter / backwashing cleaning up to 80%
- Convenient pool cleaning at the touch of a button.
- Powerful water circulation: Cuts main filter running time up to 60%
- Largest national robotic support network in the industry

AQUA PRODUCTS

THE WORLD'S LEADER IN ROBOTIC POOL CLEANING SOLUTIONS

The World's #1 Selling Robotic Cleaner Brand Gives You Performance, Reliability & Savings That No Other Cleaner Can!

Aquabot Turbo® utilizes state-of-the-art microprocessor technology in cooperation with a multitude of sensors to completely clean pools as large as 50' long, regardless of their surface type, in a mere 3 to 4 hours or less. Aquabot Turbo® cuts your total pool maintenance costs further by saving thousands of gallons of chlorinated water through the reduction of as much as 80% of evaporation and main pool filter cleaning. No wonder Aquabot Turbo® is the world's #1 selling robotic pool cleaner.

Designed with you in mind, Aquabot Turbo® offers you the convenience of complete pool cleaning - floor to waterline and everywhere in between - at the mere touch of a button. Having its own built-in motors and filtration system Aquabot Turbo® operates completely independent of the pool's filtration system, eliminating the need for sloppy, tangling hoses and costly-to-operate booster pumps, as well as decreasing pool filter usage and wear up to 60%. This saves you up to \$2,000 on energy bills alone every year.

Simply plug it in, drop it in and press a button. The days of expensive yearly pool cleaner repairs are over as Aquabot Turbo® is engineered for reliable, worry-free operation, having less than 10 moving parts and cannot become stuck on stairs or ladders. In fact, replacement of its main components, such as the drive or pump motors cost as little as 1/2 than non-Aquabot® brands. Here's what else you get with Aquabot Turbo®.

Scrubbing Action - Aquabot Turbo's® front and rear rotating scrubbing brushes loosen and remove heavy dirt and fine particles from floor, walls and waterline to be vacuumed and trapped in its own internal microfilter bag.

Vacuuming - Aquabot Turbo's® exceptionally high suction power and large offset vacuum intake ports enable it to easily vacuum up all types of dirt and debris, and without clogging.

Built-in Filtration System - Aquabot Turbo® will clean and purify thousands of gallons of water per hour. Aquabot Turbo® is equipped with a large capacity, reusable microfilter bag that has the capacity to hold many leaves and twigs. It is capable of filtering out all types of fine particles including sand, silt, algae and bacteria. The filter bag is easily removed and rinsed clean.

Better Chemical Distribution - As a result of Aquabot Turbo's® heavy-duty pumping action, the pool's bottom and surface water are circulated, raising the overall water temperature which reduces heating costs and creates a more even distribution of provides a more accurate water test, saving up to 30% of chemicals.

Best Climbing & Body Protection - Equipped with the patented G-Tooth™ Drive Tracks with large girth teeth and spacing for enhanced climbing of stairs and ledges and extensions outside body perimeter to protect cleaner's body from abrasive wear in rough surface pools.

No Installation - Operation is as simple as dropping Aquabot Turbo® into your pool, plugging it into its low voltage transformer and pushing a button. It does the rest by itself. Aquabot Turbo® is the safest and easiest cleaner to use, and costs on average about 10¢ a day to run.

Low Maintenance - Constructed of corrosion-proof materials, with fewer than 10 moving parts, Aquabot Turbo® requires little or no maintenance.

Leading Quality Assurance & Engineering - Aqua Products® is the world's largest and leading manufacturer of robotic swimming pool cleaners. Operating in over 40 countries, Aqua Products® employs the highest quality assurance manufacturing and design processes to ensure the most reliable products. From separate internal motor casings for lower long term repair costs to using brushless DC motors for limitless operating hours without failure to using drive belts that reduce drive motor load for lower wear, Aquabot Turbo® is specifically engineered for the harsh conditions incurred within the swimming pool environment.

Aquabot Turbo® scrubs pool walls, waterline and most steps while it vacuums and filters out pool dirt and debris.

Aquabot Turbo's® self-contained filtration system removes large debris and particles as small as 2 Microns.

Specifications

Designed for Pools:	Up to 50' length of any surface
Suggested Cleaning Time:	3 to 4 hours (50' pool length)
Customization:	Yes, adjustable timer allows for customized cleaning cycles up to 7 hours or can operate automatically with external timers, including auto-control pool equipment
Filtration Quantity:	4,200 gallons per hour
Cleaning Coverage:	6,500 square feet per hour
Filtration System/Capacity:	Self-contained, 23-Quart capacity; Large leaves to fine particles - down to 2 microns
High Volume Filter Pump:	Brushless, individually sealed with heat-dissipating and lubricating oil for longer motor life
High Performance Drive Motor:	Brushless, individually sealed with heat-dissipating and lubricating oil for longer motor life
Drive System:	Indirect belt drive - reduces stress load for longer drive motor life
Cord:	61 ft. - buoyant thermoplastic rubber - No chlorine corroding Kevlar®
Operating Cost:	Approximately 10¢ per cleaning cycle
Wattage:	155 Watts
Voltage:	115 V / 60Hz, 24V at cleaner
Warranty:	Up to 2 years with consumer registration
Safety & Reliability:	Cleaner, cord and power supply are ETL listed to UL Standards - the highest safety and reliability certification in the industry
Unit Dimensions / Weight:	16" x 14.5" x 10" / 17.5 lbs.
Shipping Dimensions / Weight:	17.5 x 17.5" x 19.5" / 38 lbs.
