

Aquabot

TURBO T2

THE POWER of ONE!

A swimming pool is a big investment and should give you enjoyment, not headaches and costly bills.

Unfortunately, its aesthetic appeal can diminish with obstructive vacuum hoses or worse yet, someone constantly in your backyard trying to clean by hand.

Protect your investment and your family while cutting costs in half and getting the most through cleaning – when you want it. Only Aquabot provides you with the power of one hour pool cleaning and quadruple functionality to scrub, power wash, vacuum and microfilter clean any pool from floor to waterline, including the water itself!

Simply drop it in and press a button! No hoses to mess with, no costly booster pumps to run or filter connections needed.

With Aquabot Turbo T2® you get:

- Complete cleaning of ANY pool in as little as 1 hour
- Quad brush system loosens stubborn debris
- Power washing jets clean where brushes can't
- Offset vacuum ports for clog-free operation
- Largest capacity reusable filter – more debris with less cleanings
- Industry's healthiest filtration and water circulation
- Convenient pool cleaning at the touch of a button
- Best warranty and support network in the industry
- Maintenance cost savings of up to 50% (chemicals, water, energy)

Complete Pool Cleaning At The Touch of a Button

AQUAPRODUCTS

THE WORLD'S LEADER IN ROBOTIC POOL CLEANING SOLUTIONS

The Turbo T2 Micromanages the Maintenance of Your Pool, Affording You More Time to Enjoy It.

In one hour or less you can begin cutting your total pool expenses by up to 50%, protect your family and friends with the healthiest swimming environment, and completely clean your entire pool... and all you have to do is touch a button.

With Aquabot Turbo T2 there's no need to mess with long sloppy hoses or break out the vacuum pole, and it doesn't matter if the wind blew dirt in the pool or it rained just after the pool was cleaned, because all you have to do is drop T2 into the pool and press a button. That's it! Nothing is more reliable or capable. Relax and go about your day knowing that within just one hour or less your family and friends can enjoy automatic protection with the healthiest swimming water and cleanest pool possible. Here's how:

- An internal, microprocessor-guided drive motor and directional clutch direct T2 to systematically clean any residential pool up to 50' in length from floor to waterline and everything in between without wasting time trying to "learn your pool," repeatedly cleaning the same area or missing spots altogether.
- T2's intelligent efficiency reduces as much as 85% of the wear and tear other cleaners incur and cleans pools up to 5 hours faster, which translates into less operating hours and cost, greater reliability and lower maintenance needs.
- Rotating quad-brush system with patented flexi-flap design scrubs loose waterline build-up and breaks down large debris without warping.
- Patented power-washing jets flush sand, silt, algae and bacteria from corners, creases, seams and surface pores where brushes can't reach.
- A powerful built-in pump motor vacuums in and circulates thousands of gallons of water per hour, increasing water circulation, reducing energy costs and cleaning without the pool's filter or booster pumps to provide the healthiest swimming environment. In fact, using your eco-friendly Aquabot Turbo T2 can reduce your pool filter's operating time by as much as 25%, decrease heat pumps or solar blanket usage and reduce chemical consumption by up to 30%.
- Front and rear vacuum ports avoid clogging and access dirt located at the furthest edges of the pool, sucking everything into its internal filter bag with no hoses required.
- The reusable microfilter bag boasts the largest holding capacity available to trap everything from large leaves and twigs to coins, gum, hair, sand, silt, algae and bacteria 10x smaller than what most pool filters can remove, allowing less cleaning and healthier swimming.

Rotating brushes break down debris while power washing jets flush up hard to reach dirt for easy vacuuming.

Specifications

Designed for Pools:	Up to 50' length of any surface
Suggested Cleaning Time:	1 Hour
Auto Shut-Off:	Yes, automatically shuts off when cleaning cycle is completed
Customization:	Yes, digital power supply allows for up to a 7-hour cleaning cycle or automatic operations with existing or new pool auto-control equipment
Filtration:	Self-contained, reusable 34-Quart capacity; Large leaves to fine particles - down to 2 microns
Filtration Quantity:	5,000 gallons per hour
Pump Motor:	Brushless, individually sealed with heat-dissipating and lubricating oil for longer motor life
Drive Motor:	Individually sealed, oil-free, water-cooled
Cord:	61 ft. - buoyant thermoplastic rubber - No chlorine corroding Kevlar®
Power Supply:	CoolTouch™ All-weather resistant
Operating Protection:	Reset Button protects from out-of-water or unintentional operation
Operating Cost:	Approximately 5¢ per cleaning cycle
Wattage:	140 Watts
Voltage:	115 V / 60Hz, 24V at cleaner
Warranty:	4 years prorated / 300 cycles
Safety & Reliability:	Cleaner, cord and power supply are ETL listed to UL Standards - the highest safety and reliability certification in the industry
Unit Dimensions / Weight:	16" x 15" x 13" / 16.75 lbs.
Shipping Dimensions / Weight:	17.5 x 17" x 19" / 35 lbs.
