OneTouch™

Home Automation Top 50 Product 2001

Wireless OneTouch™

Home Automation Top 50 Product 2002

Electronic House Top 50 Best Product of the Year 2001

Jandy®

The AquaLink® RS line has garnered top awards from both *Home Automation* and *Electronic House* magazines.

The editors of **Home Automation** magazine have honored AquaLink® RS Control Systems two years in a row by naming the Jandy® AquaLink® RS OneTouch™ and the Wireless OneTouch™ to its Top 50 product lists for 2001 and 2002.

Home Automation's editors sought out products that were noteworthy for their "innovation, functionality and ingenuity." In addition to Water Pik Technologies, Inc., other manufacturers selected for the list included Intel, Dell, Sony, Microsoft and Zenith.

"It is extremely gratifying to see Jandy® controls honored with these other trusted brands. We want to abolish the myth that owning a pool and spa requires a lot of work. Our products enable people to spend time enjoying their pools, rather than maintaining them," said Robyn Gabel, Product Manager for Jandy Electronics.

Electronic House magazine has also recognized the AquaLink® RS line by naming the Wireless OneTouch™ one of the top 50 Best Products of the Year for 2001.

"These [50] automated systems and components stood out from the pack in 2001, pushed the envelope and innovated," wrote Rachel Cericola, *Electronic House* Editor-in-Chief. Other brand names included in this list of 50 were Mitsubishi, Philips and Infinity Systems.

"This special recognition deserves to be shared by the talented pool and spa professionals who install Jandy® control systems in their clients' homes," said Robyn Gabel. "Through our trade partners, we have educated thousands of pool and spa owners about the convenience of automation."

"We want to abolish the myth that owning a pool and spa requires a lot of work. Our products enable people to spend time enjoying their pools, rather than maintaining them."
