SAVER
SOLAR
HEATING SYSTEM

**20%
LARGER**
than other
panels.
Larger panels mean
more heat for
your pool!

SPECIAL FEATURES!

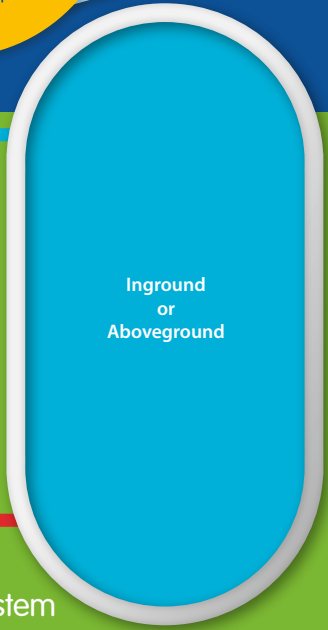

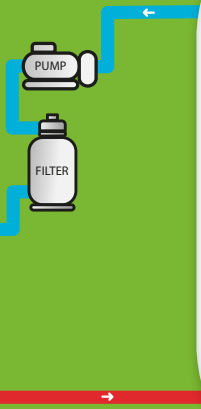

- **2 Sizes Available**
10' "Space Saver" system consists of 2 - 10' panels, 20' system consists of 1 - 20' panel
- **Maximum Heat Solar Panels**
20% larger than most panels means more heat for your pool
- **Unique Modular Design**
makes it easy to install multiple panels together
- **Expandable System**
you can add additional panels at any time, NOW or LATER
- **Flexible and Easy to Install**
made of LDPE material the Eco-Saver panels are durable and resistant to pool chemicals
- **Twist Connect Fittings**
installation is simple. With quick connect fittings, all you need is a screwdriver
- **Optional Diverter Kit**
diverter valve lets water bypass panels
- **Safe To Use**
no gas lines, no fumes NO pollution

**HEAT UP
YOUR SUMMER!**

With the Eco-Saver Solar Heating System, an extended summer means more fun for the kids and more relaxation for you!

WORKS WITH YOUR POOL FILTER SYSTEM

Using your existing filter system, water circulates through the Eco-Saver solar panel, is heated by the sun and returns to the pool through the filter system raising your pool's temperature up to 15 degrees.

**5 Year
Warranty**

ENVIRONMENTALLY FRIENDLY!

Save the environment and save money too! The Eco-Saver Solar Heating System works when your pump is running. **No additional electricity is required!**
No gas or propane...no pollution!

**10' "SPACE SAVER" SYSTEM
SAVES SPACE IN YOUR YARD**

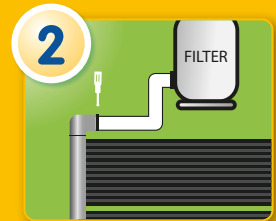

10' panels will fit many places a 20' panel will not. 10' panels can be installed on a shed, a garage or hidden out of site.

**EASY TO
INSTALL**

1
Unroll the flexible, easy to handle Eco-Saver panel

2
Connect one hose from the pool filter to the Eco-Saver panel

3
Connect the other hose from the Eco-Saver panel to the pool inlet fitting
