

# Hi-Flow™

## Backwash Valve

By Pentair Pool Products®

## Trouble-free performance for side-mounted sand and D.E. filters

Our Hi-Flow™ backwash valve is designed for maximum performance and working pressures. It features the same quality and reliability you've come to know and expect from Pentair. It's pre-plumbed for easy installation in side-mounted sand or D.E. (diatomaceous earth) filter applications.

### Key features include:

- Solid, injection-molded PVC housing permits leak-free solvent welds to PVC piping.
- Large, reinforced one-piece handle for years of trouble-free operation.
- High efficiency, center intake diverter is made of heavy-duty, glass-filled Noryl® thermoplastic for strength and heat resistance.

The Hi-Flow valve features full six-position, positive lock operation plus a special winterizing position providing access to a full range of filtration system capabilities.

# Hi-Flow™ Backwash Valve

Engineered to accommodate up to 125 gpm flow rates with proper component combinations

Clearly and permanently marked ports for ease of plumbing

Two-inch inlet and outlet ports for unrestricted water flow

## Full-feature valve offers maximum control

The Hi-Flow™ valve provides precise control of pool filter functions. And as with all Pentair valves, the Hi-Flow valve is designed to perform flawlessly for years to come.

### Other features include:

- Full two-inch inlet and outlet ports for unrestricted water flow during all cycles.
- Clearly and permanently marked ports for ease of plumbing with either sand or D.E. (diatomaceous earth) filters.
- Engineered to accommodate up to 125 gpm flow rates with proper system plumbing and compatible pump/filter combinations.
