La Mesa Stand/*aquaBoard* Diving Board INSTALLATION INSTRUCTIONS

Refer to these instructions when using a 6, 8 or 10 foot Duro-Beam *aquaBoard* with this 6, 8 or 10 foot La Mesa diving stand.

All 6, 8 and 10 foot La Mesa stands now have a 4" hole located in the bottom of the base for use when installing the Duro-Beam *aquaBoard* BOARD FALL water feature.

Use the enclosed cardboard template for locating the correct stub-up location during jig placement.

If installing a BOARD FALL or lighted waterfall feature, ensure that a 1/2" (minimum) water stub-up and when applicable, an electrical conduit is located within the area designated by the enclosed cardboard template. Provide a minimum of 10 gallons per minute water flow for the BOARD FALL water feature. Ensure electrical conduit, wiring, and transformer installations comply with local or national electrical codes, whichever is greater. **NOTE: Maximum water supply is 1-1/2" PVC.**

To ensure all plumbing and electrical conduit will pass through the bottom of the base, it must pass through the 4" hole in the cardboard template.

You MUST refer to the La Mesa/Los Arcos dive stand installation manual for proper jig placement locations, minimum diving envelope requirements and installation information.
