

- CLEANS ENTIRE POOL: FLOOR, WALLS, STEPS, BENCHES, AND SPAS
- PATENTED DEBRIS COLLECTION ZONE
- 99% CLEANING GUARANTEED
  - ALWAYS SWIM READY
- NO ROBOTIC CLEANERS AND HOSES TO REMOVE
  - SAVES CHEMICAL & ENERGY COSTS WITH IMPROVED CIRCULATION
- NO ROUTINE MAINTENANCE
- LIMITED LIFETIME WARRANTY ON CLEANING JETS

MDX<sup>®</sup> & SDX DRAINS ARE COMPLIANT WITH THE VIRGINIA GRAEME BAKER ACT 2008.

## BUILD YOUR POOL TO CLEAN ITSELF

When it comes to spending your free time there are more important things to do than tending to your swimming pool. Thanks to PCC2000<sup>®</sup>, the automatic in-floor pool cleaning and circulation system, your pool can be built to clean itself while you relax. Built right into the pool shell, PCC2000<sup>®</sup> is engineered to clean your entire pool, including floors, steps, benches, walls, even spas. PCC2000<sup>®</sup> is custom-designed for your unique pool shape. It is so effective that it will clean more than 99% of your entire pool, guaranteed, as well as significantly reduce heating and chemical costs for the life of your pool. When not operating, the cleaning jets disappear back into the pool floor, making it virtually invisible. There are no vacuum hoses left floating in the pool. All that's left is a sparkling clean pool that's ready to enjoy.

### HOW IT WORKS:

1. Rotating pop-up cleaning jets are placed in floors, steps, benches and even spas to clean the entire pool\*. These cleaning jets work together to sweep debris toward the patented debris collection zone.
2. The patented debris collection zone uses a combination of fixed non-rotating cleaning jets on the pool floor and downjets on the walls which continuously direct debris into the MDX<sup>®</sup> Anti-Entrapment Debris Drain.
3. The optional \*\*MDX<sup>®</sup> Drain with anti-entrapment technology also readily removes large debris.
4. An optional debris canister\* collects the large debris for convenient disposal.
5. The PCC2000 automatic water valve functions as the brain of the system and directs a powerful flow of water to each set of cleaning jets. The low profile water valve requires no routine maintenance, and is also 100% pressure safe.

\*MDX<sup>®</sup> Debris containment canister and nozzles in steps, benches, swimouts, and spa are optional.  
**\*\*WARNING:** MDX<sup>®</sup> and SDX must be installed in accordance with Paramount's written instruction manual, and in conformity with applicable Federal, State, Local and Swimming pool industry building and safety codes.

CLEANING SYSTEMS COMPANY**

## PCC2000 SAVES CHEMICALS, ENERGY AND MONEY WITH IMPROVED CIRCULATION.

Not only is PCC2000® a powerful pool cleaning system, but it's also an advanced circulation system. Ordinary pools circulate water near the surface of the pool, where chemicals and heat are quickly lost into the atmosphere. This often leads to wasted chemicals, wasted heat energy and several poorly circulated algae-prone areas throughout your pool.

PCC2000 improves the poor circulation found in ordinary pools. Using rotating cleaning jets strategically placed in the pool floor, steps and benches, PCC2000 evenly circulates water throughout every square inch of your pool. This improved circulation has been proven to create cleaner, healthier more comfortable pool water while reducing the loss of chemicals and heating energy to the atmosphere. This means PCC2000 will save you money while it delivers healthier water.

Independent studies have proven that you can expect significant savings in chemical costs and heating costs for the life of your pool.

### CIRCULATION BENEFITS:

- ENJOY CLEANER, HEALTHIER WATER.
- NO POORLY-CIRCULATED ALGAE-PRONE AREAS.
- ELIMINATES COLD SPOTS FOR MORE COMFORTABLE SWIMMING.
- SAVES CHEMICALS FOR THE LIFE OF THE POOL.
- SAVES ENERGY COSTS FOR THE LIFE OF THE POOL.
- BETTER FOR THE ENVIRONMENT.
- INDEPENDENTLY PROVEN TO SAVE YOU MONEY FOR THE LIFE OF YOUR POOL.
