***REVIVE! – The New
Revolution in Pool Water Care***

REVIVE!

REVIVE!® is a multi-action product that removes phosphates (algae food), metals including copper and iron, scaling carbonates, organic debris and other contaminants that cause cloudy water. It is formulated for use on new pool startups, replaster / remodel / refills, spring openings, abandoned pools, severe algae cleanups and ongoing maintenance of all swimming pools.

REVIVE! is compatible with all pool chemicals, sanitizers and finishes and does not require any pre-balancing or pre-treatments. Plus, it will not cloud the water or stain pool decks.

- **REVIVE!** *does the work of several products – phosphate remover, metal treatment and clarifier*
- *Ideal for well water!*
- *Perfect for soft-side pools at startup!*

REVIVE! is excellent for severe algae cleanups

32 oz treats 24,000 gallons

*Green to clear vacuum cleanups
made easy without clouding!*

Before treating with REVIVE!

- *Removes orthophosphates up to 2000 ppb*
- *Removes copper and iron up to 2.0 ppm*
- *Captures scaling carbonates*
- *Clears water of organic debris*

24 hours after treating with REVIVE!

REVIVE!'s hose-end sprayer ensures complete coverage of the pool surface.

START-UP

New pool construction or renovation (unfilled pool):

When initially filling the pool, add **REVIVE!** (32 oz per 24,000 gallons) into the deep end. As the water level rises, **REVIVE!** will treat the pool walls and source water resulting in clean, clear water for the initial fill. When filling is complete, brush/vacuum pool and continue with regular water care program.

CLEAN-UP

Phosphate build-up, severe algae, metals, or scaling (filled pool):

Note: Double dosage for heavily contaminated pools

If algae is present, brush walls and shock pool prior to application. Turn off circulation pump and filter. Attach a garden hose to **REVIVE!** bottle and apply the entire contents over pool surface. Wait 24 to 48 hours for debris to settle to pool bottom then slowly vacuum to waste. Once pool floor is clean restart circulation pump and filter. If water clouds after filtering, clean filter and circulate for 24 hours or until clear and thoroughly vacuum again.

MAINTAIN

Routine problem-solving and preventative maintenance:

Continue to circulate pump and filter. Attach a garden hose to **REVIVE!** bottle and apply over the pool surface twice, using about 6-8 oz. **REVIVE!** will work together with the pool filter to remove phosphates, metals, scaling carbonates and debris, without clouding the pool water. Clean or backwash filter after 7 days. For best results, repeat weekly.

REVIVE!® is an ideal treatment for:

- Removing phosphates, metals, scaling carbonates and organic debris in all pools
- Preventing scale on salt system equipment
- Protecting new pool surfaces from stains
- Reducing plaster dust on new pools and remodels

Gallon treats
96,000 gallons

16 oz treats 12,000 gallons

REVIVE!® Frequently Asked Questions & Answers

Q: What is REVIVE!?

A: REVIVE! is a multi-action specialty product that removes phosphates (algae food), metals including copper and iron, scaling carbonates, organic debris and other contaminants that cause cloudy water and stain pool surfaces. It is formulated for use on new pool startups, replaster / remodel / refills, spring openings, abandoned pools, severe algae cleanups and ongoing maintenance of all swimming pools. REVIVE! is compatible with all pool chemicals, sanitizers and finishes and does not require any pre-balancing or pre-treatments. Plus, it works in any pH or sanitizer level, won't cloud the water or stain the pool deck.

Q: Why is REVIVE! better than other products?

A: REVIVE! clears pool water fast and easy! Other products can take several days to work, require special balancing and can cloud water and clog the filter. REVIVE! does not require any pre-balancing, is compatible with all pool chemicals and will not cloud water or clog your filter. REVIVE!'s "silt technology" even allows vacuuming of severe cleanups without dusting or clouding the water. REVIVE! does the work of several products by simultaneously removing phosphates, metals, scaling carbonates, and organic debris in one easy application.

Q: How is REVIVE! packaged?

A: REVIVE! is conveniently packaged in a 16 or 32 ounce ergonomic bottle with a hose-end sprayer top designed for even distribution over your entire pool. An economical 1 gallon and 30 gallon service size is also available.

Q: Where can I find REVIVE!?

A: REVIVE! is available exclusively from swimming pool and spa professional retailers. Visit our website at apiwater.com or call 800-407-9964 to locate an authorized REVIVE! dealer near you.

About APi

APi was founded in Jupiter, Florida in 1997 after recognizing the need for simpler pool and spa water care programs. All APi products are based on the philosophy that preventing problems is more efficient than treating problems. Our proprietary solutions include E-Z POOL® and EZ SPA® water care lines and specialty products like REVIVE!®, FLIP OUT™ and CLOUD OUT™. Visit our website at apiwater.com for more information.
