

# SCALETEC<sup>PLUS</sup>

## PRODUCT DATA SHEET

### PRODUCT FUNCTION:

High performance swimming pool calcium descaler, iron stain, and scum remover-preventative. First pourable product that removes hardwater buildup throughout pool surfaces, tile, and all equipment without scrubbing and acids. Pour directly into pool only. Highly effective in preventing iron, copper, and manganese stains. Powerful Synertec formula provides long lasting, affordable protection year-round with just a small monthly application.

### HOW IT WORKS:

Scaletec Plus' unique Synertec formula involve components that remove both new and old white calcium and mixed composition scales and metal stains. This process involves a combination of super-sequestration, crystal modification - absorption, and threshold inhibition. Scales and stains are both loosen from surfaces and redissolved into pool water which are filtered away or kept in suspension.

### FEATURES:

1. The strongest scale, stain, & scum remover and inhibitor available.
2. Non acidic, non-staining, low phosphates, and enviro-safe components.
3. Powerful Synertec formula is highly chlorine stable, provides long lasting protection, and maintains effectiveness in extreme water hardness levels above 1500 ppm.

### SELLING POINTS

1. Scaletec Plus is the first pourable calcium descaler-remover added directly to pool water to cleanup pool surfaces, tile, filter, and all other pool equipment.
2. Excellent pretreatment to an acid wash especially for pools with very old scale.
3. Obtain visible cleanup and descaling results in just 2 to 4 weeks.
4. No pool draining, no hard laborious scrubbing, and no pool surface damage.
5. Affordable, do-it-yourself cleanup requires no special equipment or knowledge.

### CONSUMER BENEFITS:

1. One bottle will descale an average 20,000 gal. swimming pool. It also provides 3 full months of continued descaling and/or scale-stain-scum preventative activity.
2. Also protects pool filter, heater, solar units, and salt generators in salt pools.
3. No wait. Swim immediately after treatment.
4. Extremely easy to use product. Just pour in. No testing required.
5. Superior winter surface descaler-stain preventative during non-swimming season.

### SPECIAL INSTRUCTIONS:

For heavily scaled pools, raise water level, add recommended dosage, and continue with weekly applications until scale is removed. Example: 20,000 gal. pool requires one full 64 oz. bottle. Some pools with older, harder scale usually require two bottles.
