

RAMUC®

## DS Water-Based Acrylic Pool Paint

An excellent solution when short down-time is critical

**Type DS** offers advantages over traditional solvent-based paints. DS Acrylic can be applied to damp surfaces and previously painted chlorinated and synthetic rubber surfaces. Use of DS allows the pool to be filled within 3 days after the final application of paint. Acrylic coatings such as DS are used when short down times are critical. Water-based acrylics are extremely color-fast and UV resistant.
