Above-Ground Automatic Pool Cleaner

**HAYWARD®**

## Automatic Pool Cleaner for Above-Ground Pools

No manual pool cleaning makes a whale of a difference.

Wanda the Whale provides you with easy, trouble-free operation. You never need to empty or replace debris bags. And because Whale works with your existing filtration system, no extra energy-consuming booster pump is required. Everything for simple, 10-minute-or-less installation is included – even the hoses.

This whale knows how to use its spout.

Plus, Wanda the Whale improves water circulation by acting as a moving main drain, pulling water from the bottom of your pool as it moves. Your water circulates and your pool stays cleaner – without the overuse of chemical sanitizers.

This whale swims with a smart crowd.

As part of a complete family of superior quality products designed to keep your pool at its sparkling best, Whale is the smart alternative to the drudgery of manual cleaning. And it's from Hayward, the company that engineered automatic pool cleaning technology.

Wanda the Whale covers a lot of ground, automatically.

Wanda the Whale utilizes patented SmartDrive® programmed steering to clean faster and more thoroughly than random cleaners. After you see how effortlessly Wanda the Whale keeps your pool clean, you'll never see a need to manually clean your pool again.
